ABOUT ME

Architect and Frontend Developer.
I'm actually studying Backend development to reach a FullStack profile (MERN stack).
I have a great ability to handle computer tools, including development softwares, programs for graphic design, and architecture design.
Flexible, committed and motivated. Dedicated, imaginative, creative and fast learner.
Strong passion for design and art.
My professional goal is to be part of a company with long term perspectives, applying my knowledge and skills to improve the services provided by the company and thus grow as a team.
